1. Introduction

$CST (Crypto Sniper Technology) is the native utility token of the Crypto Sniper Bot — a professional, non-custodial multi-chain sniping and trading terminal live across nine blockchains (Ethereum, BNB Chain, Polygon, Arbitrum, Base, Avalanche, Fantom, Cronos, Linea, zkSync Era, Monad, Robinhood and Solana).

$CST is deliberately designed as a pure utility token. It offers no yield, no dividends and no promise of profit. Its entire reason to exist is functional: holding $CST unlocks the bot's most powerful features, reduces trading fees down to zero, and can be used to pay the software license. Because the token plugs directly into a product that already generates real revenue, demand is driven by usage rather than speculation.

This document describes the token's utility model, its fee mechanics, distribution, the competitive context, and the security properties of the smart contract.

Three principles

Utility-first

Your $CST balance unlocks tiers inside the bot — from automatic sniping to MEV protection to zero fees. The more you hold, the more the terminal does for you.

Deflationary by design

Every sell routes 18.45% of its tax into an automatic buyback & burn. Real trading volume permanently removes $CST from circulation — scarcity backed by usage, not hype.

Fair & auditable

Fixed supply, no mint function, a fee hard-capped at 3.69%, no blacklist, and vested team tokens. The contract is clean and built to be read line by line.

2. Utility Tiers

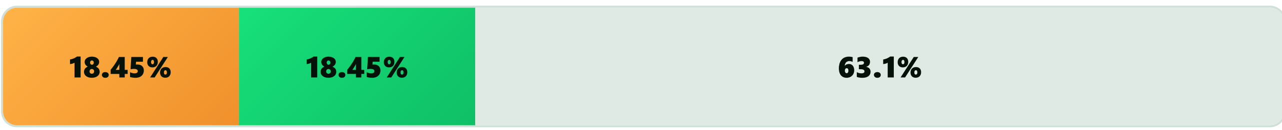
Access is based on how much $CST sits in the wallet connected to the bot — no lock-up is required. You can sell at any time; your tier simply follows your balance. Each tier both unlocks features and lowers the base trading fee.

Tier	Hold ($CST)	Unlocks	Bot fee
Free	0	Manual buy & sell across all 13 chains.	**0.369%**
Bronze	25,000	+ Automatic snipe & auto-sell (take-profit / stop-loss).	**0.25%**
Silver	100,000	+ MEV protection & Copy Trade (whale tracking).	**0.15%**
Gold	500,000	+ Multi-chain simultaneous operations & exclusive ranking badge.	**0.08%**
Diamond	**2,000,000**	**+ Zero trading fee, early access to new features & light governance vote.**	**0.00%**

The monthly software license can also be paid in $CST at a discount. That payment is partly burned and partly routed to the project treasury, creating recurring buy demand.

3. Fee Routing

The $CST contract applies a 3.69% tax on sells only — buys and ordinary wallet-to-wallet transfers are 0%. The collected tax is settled fully in BNB and split three ways automatically, on-chain, on every sale:



Buyback & Burn — 18.45%

BNB buys $CST back from the liquidity pool and burns it. This produces visible on-chain buy pressure and real, permanent deflation of the supply.

Liquidity — 18.45%

Paired with $CST and added to the pool, deepening liquidity so that every future trade experiences lower slippage.

Operations — 63.10%

Sent directly to the project wallet to fund development, infrastructure, marketing and support. There is no manual withdraw of $CST and no accumulation.

4. Tokenomics

Total supply is fixed at 100,000,000 $CST (18 decimals). There is no mint function — supply can only decrease through the buyback & burn. Team and advisor allocations are vested; liquidity is locked. The distribution is designed so the project can survive well past its launch week.

Allocation	Share	Supply
Liquidity (DEX)	20%	20,000,000 $CST
Treasury / Operations	20%	20,000,000 $CST
Presale / Public sale	15%	15,000,000 $CST
Ecosystem rewards	15%	15,000,000 $CST
Team (vested)	15%	15,000,000 $CST
Buyback & Burn reserve	10%	10,000,000 $CST
Advisors / Partners	5%	5,000,000 $CST

5. Competitive Landscape

The leading Telegram/desktop sniper bots charge between 0.5% and 1% per trade, usually on fewer chains and without a real in-app utility token. The table below compares Crypto Sniper Bot to the market as observed publicly in July 2026.

Platform	Token · Supply	Trade fee	Chains	Speed	License / monthly	Sustainability
Crypto Sniper Bot BEST	**$CST · 100M**	**0.369%**	13 …	**<1s**	**$93.69 once / $19.63·mo**	**Buyback + Burn + Liquidity**
Banana Gun	$BANANA · 10M	0.5-1%	4	<1s	no license	40% fee to holders
Maestro	— no token	1%	4	fast	$200/mo premium	fee only
Trojan	— no token	0.9-1%	1	fast	no license	fee only
BonkBot	$BONK · 589T	1%	1	fast	no license	buys BONK - 10% burn
Unibot	$UNIBOT · 1M	1%	2	med	no license	holder fee discount

** 0.369% is the base bot fee; $CST holders pay as little as 0%. Competitor fees are as observed publicly in July 2026 and are subject to change.*

⛓ The 13 networks $CST holders trade on

🏆 Why Crypto Sniper wins

- ✓ Lowest fee on the market — 0.369% base, down to 0% for $CST holders
- ✓ 13 networks in one app — more than any competitor (nearest has 5)
- ✓ First-block execution speed with MEV protection built in
- ✓ Own utility token with real deflation (buyback + burn + liquidity)
- ✓ Flexible payment: lifetime license OR monthly, payable in $CST at a discount
- ✓ Copy trade + public ranking — features no competitor bundles

6. The Ecosystem Loop

$CST is not a token bolted onto a product — it is wired into how the bot already works. Usage drives demand, and demand drives scarcity, in a self-reinforcing cycle:

1. Traders hold $CST

to unlock features and cut their bot fee, creating organic buy demand from real users.

2. They trade & pay licenses

the bot fee and $CST license payments flow into the ecosystem every day.

3. Every sale burns & deepens

18.45% buys back and burns, 18.45% deepens liquidity — automatically, on-chain.

4. Supply shrinks, utility grows

a scarcer token plus a bot that keeps shipping features gives a reason to hold that is not a promise.

7. How to Get $CST

$CST trades on BNB Chain via PancakeSwap (V2). If you have ever swapped a token, you already know how.

1. Get a wallet + BNB

Install MetaMask (or any Web3 wallet), switch to BNB Chain, and fund it with a little BNB for the swap and gas.

2. Open PancakeSwap

Go to PancakeSwap (V2), connect your wallet, and paste the official $CST contract address.

3. Swap BNB to $CST

Choose your amount and confirm. Buys are 0% tax — you receive exactly what you swap for.

4. Unlock your tier

Open the Crypto Sniper Bot with that wallet; your tier and fee discount activate automatically.

> **$CST CONTRACT (BNB CHAIN): revealed at mainnet launch — currently in final testnet validation.**

Always verify the contract address on our official channels before buying. Never trust an address provided by anyone else.

8. Contract Security

The following properties are enforced by the smart contract code itself and can be verified on-chain:

✓ **Fixed supply.** 100,000,000 $CST minted once at deployment. No mint function exists; supply can only go down.

✓ **Sell-only fee.** The 3.69% fee applies only to sells. Buys and transfers are 0% — hardcoded, not a togglable buy-fee.

✓ **Fee hard cap.** The maximum sell fee is a constant 3.69%. The owner can only lower it, never raise it.

✓ **No blacklist.** There is no blacklist or bot-trap mapping. No wallet can ever be blocked from selling.

✓ **No wallet/tx limits.** There are no maxTx or maxWallet limits the owner could shrink to freeze holders.

✓ **One-way launch.** Trading is enabled once and can never be paused again.

✓ **Owner cannot pull $CST.** The dev wallet receives its share automatically in BNB; there is no manual $CST withdraw.

✓ **Renounceable ownership.** Standard OpenZeppelin Ownable — ownership can be renounced after launch.

9. Roadmap

PHASE 0 · NOW

Foundation

- Bot live on 13 chains
- $CST contract built & audited-clean
- Testnet validation

PHASE 1

Launch

- Mainnet deploy + LP lock
- Tier system live in the bot
- Airdrop to existing users

PHASE 2

Growth

- Pay license in $CST
- Referral rewards in $CST
- Ranking prizes

PHASE 3

Expand

- Light governance vote
- Cross-chain $CST utility
- Android + cloud engine

10. Disclaimer

$CST is a utility token designed solely to access features of the Crypto Sniper Bot. All financial assets involve risk. We are not responsible for any losses incurred by users while using our token or the Sniper Bot. Do your own research (DYOR). Nothing in this document is financial advice — only use funds you can afford to lose and comply with the laws of your jurisdiction.
